

Booming Bass

The answer to the Pro Bass Man's Dream

General • Fully modularized, each electronic section is made with a plug-in circuit board • Exclusive equalizer circuits • 2 channel input for bass guitar, guitar, or stereo guitar, accordion • Unique acoustic ventilation baffle eliminates heating • 2 special 12 inch heavy duty speakers, approx. 2 lbs. ceramic magnets.

Electrical • No output transformer • High and extended low-gain input jacks for each channel • RF input filters eliminate radio frequency interference • High/low frequency controls • Electrostatically shielded power transformer for automatic anti-hum performance • Completely enclosed cabinet • External speaker jack • Red, on/off, push-type illuminated switch • Detachable line cord • AC outlet

Size: 30 inches wide; 25 inches high; 9 1/2 inches deep

**A Solid-State Bass Amplifier
with Power-to-Spare (115 watts), weighs only 46 lbs.
and Faithfully Reproduces True Guitar and Bass Tones.**

The dynamic, booming HAYNES BASS KING features:
1 — A Circuit Breaker that prevents burnout or blowout of
all components including speaker. 2 — A new Circuit Design
that adds realism and "slap" to string sounds.

BASS KING AUXILIARY EXTENSION SPEAKER

Created especially for the Bass King Amplifier with 2 high powered speakers designed for maximum wide
